INSTRUCTION

Print the model on 200g/m² paper. Use WhiteGlue and a glue stick for gluing.

Prepare a bamboo stick with a diameter of approximately 2mm, any length.

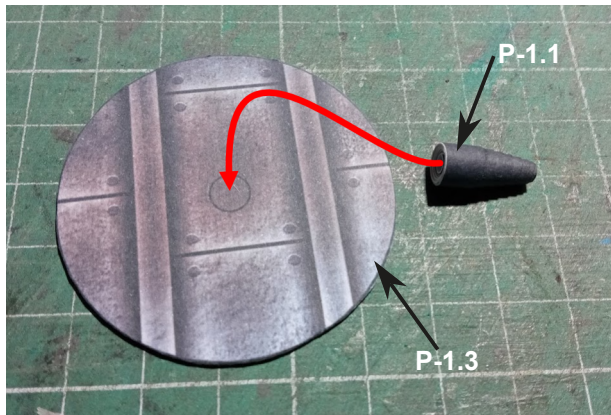

Wrap part P-1.1 tightly in one layer and glue it so that the paper strip does not unwind. Do not glue the P-1.1 paper strip to the stick.

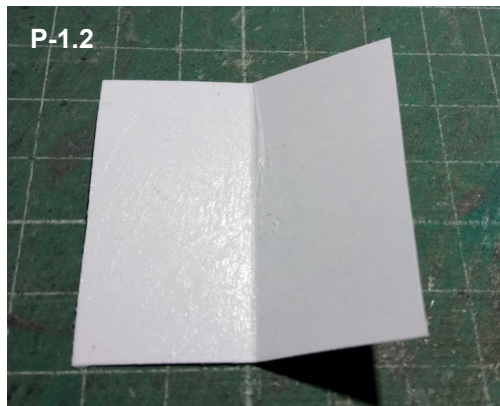

Then wrap the strip to the end and glue this end.

Slide part P-1.1 off the stick and let it dry.

Stick part P-1.3 on thick cardboard or on 4 layers of 200g/m2 paper and cut it out after drying.

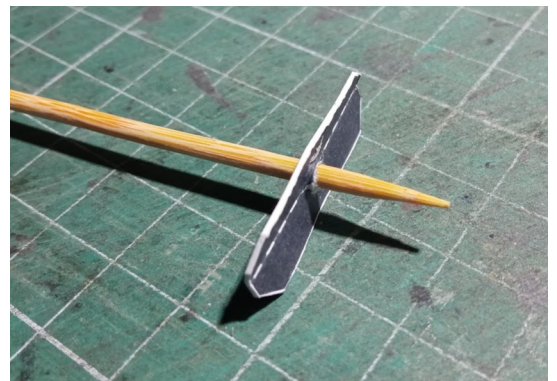

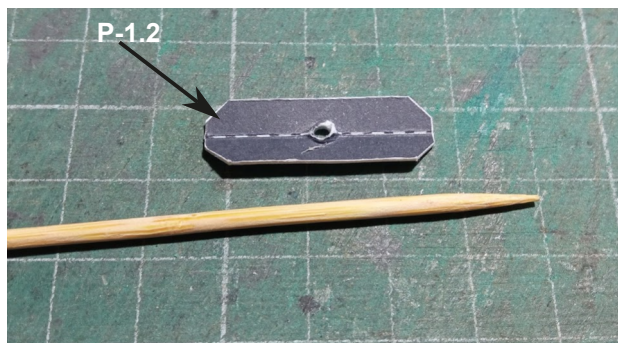

Then glue the bottom of part P-1.1 to the center of the base P-1.3.

Part P-1.2 needs to be glued, cut out, then shaped and a hole made the same diameter as the stick.

Then glue part P-1.2 to the stick at a distance of approximately 15mm from the pointed end.

Paint the stick black.

Finally, without gluing, place the plane on the stick. During the game, you can move the plane to another stick, higher or lower.
